

Schools Division of Bayugan City

SCHOOL MANAGEMENT SYSTEM

System Guide & User Manual

Version: **1.0**

Date: **April 2026**

Platform: **Web Application (Next.js)**

Database: **Supabase (PostgreSQL)**

SYSTEM OVERVIEW

What is the School Management System?

The School Management System (SMS) is a comprehensive web-based application built for the Schools Division of Bayugan City under the Department of Education (DepEd). It manages the complete lifecycle of school operations including enrollment, academic records, attendance, learner health, book inventory, staff management, evaluations, and official DepEd School Forms (SF1–SF10).

User Roles

Role	Access Level	Description
School Head	Full school	Principal — manages school settings, staff, all modules
Admin	Full school	School-level administrative staff
Registrar	Full school	Records management, enrollment processing, SF10 encoding
Librarian	Books module	Book allocations, issuances, returns
Teacher	Restricted	Own sections, grade entry, books, ECCD, evaluations
Division Admin	All schools	Manages schools & users across the division
Super Admin	Full access	System-wide administration
Student	Portal only	Read-only grades, evaluations (LRN + DOB auth)

Main Modules

Module	Purpose
Enrollment	Register new, existing, and transferee students
Students	Student registry, profiles, search
Sections	Class groupings by grade level and school year
Subjects	Academic courses per grade level
Schedules	Time slots — subjects, teachers, rooms, sections
Attendance	Monthly AM/PM daily attendance (SF2)
Learner Health	Height, weight, nutritional status (SF8)
Books	Allocations, issuances, returns tracking
Staff	Staff member management
Rooms	Room/facility management
Evaluations	Student-to-teacher & teacher-to-principal evaluations
Reports	DepEd School Forms SF1–SF10 generation
Manage Requests	Transfer approvals & document requests
Settings	School configuration, locks, principal info, ECCD
Student Portal	Student-facing grades & evaluation portal
Division Admin	School & user management across the division

Technology Stack

Layer	Technology
Framework	Next.js (App Router)
Frontend	React, Tailwind CSS, shadcn/ui (Radix UI)
Backend/DB	Supabase (PostgreSQL + Auth)

State	Redux Toolkit
Forms	React Hook Form + Zod validation
Auth (Staff)	Supabase Auth
Auth (Students)	JWT cookie via jose (LRN + DOB)
PDF Generation	jsPDF
Excel Export	xlsx

System Access

The SMS is accessed through a web browser. Staff members log in using their email credentials via Supabase Auth. Students access a separate portal using their LRN and date of birth. Public users can browse schools, view enrollment statistics, and submit document requests without authentication.

Authentication Flows

Staff Login

Step 1: Staff navigates to the login page

Step 2: Enters email and password (Supabase Auth)

Step 3: AuthGuard checks session and looks up sms_users record

Step 4: User data (type, school_id) loaded into Redux store

Step 5: Redirected to role-appropriate dashboard

Student Portal Login

Step 1: Student navigates to /student-portal

Step 2: Enters LRN and Date of Birth

Step 3: Server action verifies against sms_students table

Step 4: JWT cookie set (24-hour expiry)

Step 5: Redirected to student dashboard

Navigation

The sidebar provides role-based navigation. Staff users see all modules relevant to their role. Teachers see a dedicated Teacher Menu with sections, grades, books, and evaluations. Division admins see the Division menu for managing schools and users across the division.

Tip: SchoolIdGuard

All school-scoped users must have a `school_id` assigned. Only `division_admin` users can operate without one. If a user lacks `school_id`, they will be blocked by the SchoolIdGuard component.

INITIAL SCHOOL SETUP

Setup Workflow Overview

Setting up a school in the SMS follows a structured process. The Division Admin creates the school and assigns users. Then the School Head configures school settings.

Phase 1: Create the School (Division Admin)

Navigate to Division > Schools and click 'Add School'. Fill in the following:

Field	Required	Description
School ID	Yes	DepEd 6-digit code (immutable after creation)
School Name	Yes	Official school name
School Type	No	elementary, junior_high, senior_high, complete_secondary, integrated
Address	No	Full street address
District	No	North, South, East, West, Central
Municipality/City	No	City or municipality name
Region	No	Region identifier
Email	No	School email address
Phone Numbers	No	Landline and mobile numbers

Phase 2: Create Users (Division Admin)

Navigate to Division > Users and click 'Add User' for each staff member.

Field	Required	Description
School	Yes	Select the school (dropdown of active schools)
Name	Yes	Full name of the staff member
Email	Yes	Unique email (used for login)
User Type	Yes	school_head, teacher, registrar, admin, or librarian
Employee ID	No	Optional employee identification number

Phase 3: Configure Settings (School Head)

Once the School Head logs in, navigate to Settings (now labeled 'School') to configure:

- Record Editing Controls — Toggle whether previous school year records and promoted student grades can be edited
- Promotion Deadline — Set a cutoff date after which the Promote button is disabled
- School Principal — Enter the principal's name and title (used as signatories on report cards and official forms)
- ECCD Settings — For schools with Kindergarten: configure assessment domains, competencies, and scale score mappings

ACADEMIC STRUCTURE

Subjects

Subjects represent academic courses at specific grade levels. They form the foundation of the scheduling and grading system.

Navigate to Subjects module to manage. Each subject has:

- Code — Unique identifier (e.g., MATH-101), auto-uppercase
- Name — Full subject name (e.g., Mathematics)
- Grade Level — Which grade this subject belongs to (K through 12, or SNED)
- Is Graded — Whether the subject appears in grade entry (uncheck for non-graded subjects)
- Is Madrasah (MEP) — Islamic/religious education subjects with selective enrollment

Protection Rule

If a subject has existing schedules, its grade level cannot be changed. If it has grades or schedules, it will be soft-deleted (deactivated) instead of hard-deleted.

Sections

Sections are class groupings (e.g., 'Grade 7-A'). Students are enrolled into sections for a specific school year.

- Section Name — Descriptive name for the class
- Grade Level — Matching grade level (must align with subjects)
- School Year — Academic year (e.g., 2025-2026)
- Section Type — heterogeneous, homogeneous_fast_learner, homogeneous_crack_section, or homogeneous_random
- Section Adviser — The assigned teacher (determines who manages this section)
- Max Students — Optional capacity limit

Protection Rule

Grade level and school year become immutable once the section has enrolled students or assigned schedules. Sections with enrolled students cannot be deleted.

Schedules

Schedules link subjects to sections, assigning teachers, rooms, days, and times. They are the operational backbone of the school.

Creating a Schedule

There are two ways to create schedules:

1. From the Schedules module directly — select subject, section, teacher, room, days, and times
2. From the Sections page — click 'View Subjects' on a section, then 'Add Schedule' on a specific subject (subject and section are pre-filled and locked)

Conflict Detection

The system performs real-time conflict detection at both client-side and database-trigger level. Three types of conflicts are checked:

- Room Conflict — Room already booked at the same time and day

- Teacher Conflict — Teacher already teaching at the same time and day
- Section Conflict — Section already has a class at the same time and day

Schedule Views

Schedules can be viewed in two modes:

- Table View — Paginated list with filters (section, teacher, room, school year)
- Calendar View — Visual calendar layout showing all schedules for the selected school year

ENROLLMENT

Enrollment Wizard

The Enrollment Wizard is the core component for registering students. It supports three entry modes based on LRN lookup results.

Entry Mode Detection

Wizard Steps by Grade Level

Grade Level	Step 1	Step 2	Step 3
Grades 1–12	Student Record	Enrollment Details	—
Kindergarten (K)	Student Record	Enrollment Details	ECCD Checklist
SNED (Special Ed)	Student Record	Enrollment Details	Disability Information

Step 1: Student Record (New Students)

Required fields for new students:

- LRN (Learner Reference Number)
- Full name (first, middle, last, suffix)
- Date of birth, Gender
- Demographics: mother tongue, IP/ethnic group, religion
- Address: purok, barangay, municipality, province
- Contact information, Parent/guardian details
- Document uploads: birth certificate, good moral (PDF/JPG/PNG)

Step 2: Enrollment Details

Select the grade level, school year, and section for enrollment.

Smart Section Suggestion

The system provides intelligent section recommendations using a weighted scoring algorithm:

- Section Type Match (40%) — Matches student GPA to section type
- Gender Balance (25-30%) — Aims for 50-50 male/female split
- GPA Distribution (20%) — Heterogeneous sections aim for equal thirds; homogeneous prefer clustering
- Capacity Availability (15%) — Emptier sections score higher

Step 3: ECCD Checklist (Kindergarten Only)

For Kindergarten enrollees, an optional ECCD (Early Childhood Care and Development) checklist is presented. Teachers check competencies the student has demonstrated. This data is saved for the 1st semester assessment period.

Step 3: Disability Info (SNED Only)

For SNED (Special Education) enrollees, a multi-select list of disability categories is shown, aligned with DepEd classification standards.

Enrollment Statuses

Status	Meaning
active	Currently enrolled and attending
promoted	Advanced to next grade level
graduated	Completed final grade level (6, 10, or 12)
completed	School year finished, no action taken
retained	Staying in same grade level
dropped	Formally dropped (NLIS)
transferred_out	Left for another school
pending_transfer	Transfer in progress
pending_review	Transferee awaiting record review

Overview

Teachers have a dedicated interface with restricted access to their own sections, subjects, and students. The teacher module is accessible from the Teacher Menu in the sidebar.

Teacher Dashboard

The dashboard shows four KPI cards:

- Sections you manage (as adviser)
- Subjects you teach (from schedules)
- Total students across all sections
- Current school year

My Sections

Shows sections where the teacher is the assigned section adviser. Clicking a section opens a detailed view with:

- Student roster with enrollment status badges and gender filter
- Student actions: Edit, Print Card, Promote, Retain/NLIS, Transfer Out
- Subject schedules with teacher and room assignments
- Quick links to: School Forms, Attendance, Learner Health, ECCD Checklist (K only)
- Export student list to Excel

Student Management Actions

Action	Available When	Description
Edit	Not terminal status	Modify student personal info
Print Card	Always	Generate report card (PDF) or ECCD card (K)
Promote	Status = active	Advance to next grade (or Graduate for terminal grades 6, 10, 12)
Retain/NLIS	Status = active	Mark as retained or NLIS/dropped
Transfer Out	Status = active	Initiate transfer to another school

My Subjects

Lists all subjects the teacher teaches (from sms_subject_schedules). Displayed as cards with section name, filterable by school year and grade level.

My Students

Aggregated view of all students the teacher interacts with, combining students from adviser sections and teaching schedules. Filterable by section, subject, and school year.

Books (Teacher)

Teachers have three book-related pages:

1. My Allocated Books — View books allocated by the book manager (quantity, status)
2. Issue Books — Issue allocated books to students in their sections

3. Return to Manager — Return held books back to the book manager for processing

Teacher Evaluations

Teachers can submit evaluations of the school principal. Each evaluation contains Likert-scale questions (1–5 stars). Teachers select an active evaluation, rate each question, and submit. Duplicate submissions are prevented.

Grade Entry

Teachers enter quarterly grades (Q1–Q4) for their assigned subjects. The grade entry interface validates that the teacher has the proper schedule or adviser assignment.

Grade Entry Flow

Grade Entry Rules

- Only graded subjects (is_graded = true) appear in the grade entry list
- Kindergarten is excluded — uses ECCD Checklist instead
- Promoted students may be locked based on school settings
- Previous school year grades may be locked based on school settings

ECCD Assessment (Kindergarten)

The ECCD (Early Childhood Care and Development) checklist replaces traditional grading for Kindergarten students.

ECCD Entry Flow

Step 3: Checklist shows domains (e.g., Physical, Cognitive, Language, Socio-Emotional)

Step 4: Each domain has competency items with checkboxes per student

Step 5: Ratings auto-save on change — checked = demonstrated (1), unchecked = not yet (0)

ECED Structure

- Domains — High-level assessment categories (configured in Settings > ECED)
- Competencies — Individual skills/behaviors within each domain
- Scale Scores — Raw-to-scale score mappings for reporting
- Periods — 1st Semester and 2nd Semester assessments

Report Cards

Report cards are generated as PDFs showing quarterly grades, final averages, and core value ratings. The school principal's name and title (from Settings) appear as signatories.

Monthly Class Attendance

The attendance module records daily AM/PM attendance for each section, aligned with DepEd School Form 2 (SF2 — Learner's Daily Class Attendance).

Recording Attendance

Attendance Grid Features

- Sticky student name column for easy navigation
- Only weekdays (Monday–Friday) are shown
- Total attendance calculated as 0.5 per period (half-day each)
- Month options span the school year: June through May
- Previous school year data may be locked based on settings

Accessing from Teacher Section Page

Teachers can quickly access attendance for a specific section by clicking the 'Attendance' button on their section detail page. The school year and section are automatically pre-selected.

LEARNER HEALTH

Health Records (SF8)

The learner health module records physical measurements and nutritional status, aligned with DepEd School Form 8 (SF8 — Learner Basic Health and Nutrition Report).

Health Data Entry

Select school year and section to view the health entry table. For each student:

Field	Type	Description
Height	Number (cm)	Student height in centimeters
Weight	Number (kg)	Student weight in kilograms
Nutritional Status	Dropdown	Underweight, Normal, Overweight, Obese
Height for Age	Dropdown	Severely Stunted, Stunted, Normal, Tall
Remarks	Text	Additional notes
Measured At	Date	Date the measurement was taken

Changes are debounce-saved (500ms) automatically. Data uses `student_id + section_id + school_year` as unique key (upsert pattern).

Accessing from Teacher Section Page

Teachers can quickly access learner health for a specific section by clicking the 'Learners Health' button on their section detail page. The school year and section are automatically pre-selected.

Overview

The books module tracks textbook inventory from school-level allocation through teacher-to-student issuance and returns. The flow is: School Inventory > Teacher Allocations > Student Issuances > Returns.

Book Inventory

The main books page lists all textbooks in the school inventory with:

- Title, Subject Area, Grade Level, ISBN
- Active/Inactive status
- Add, Edit, and Delete operations

Allocations (Manager to Teacher)

Book managers allocate books to teachers. Each allocation specifies the teacher, book, quantity, and school year. Navigate to Books > Allocations to manage.

Issuances (Teacher to Student)

Teachers issue books from their allocations to individual students. Navigate to Books > Issuances or use the teacher's 'Issue Books' page.

Issue Flow

Return Flow

Step 2: Click Return — enter return date, condition, and return code

Step 3: Return codes: FM (Force Majeure), TDO (Transferred/Dropout), NEG (Negligence)

Step 4: Teacher submits returns to book manager via 'Return to Manager' page

DEPED REPORTS (SF1–SF10)

Overview

The Reports module generates all mandatory DepEd School Forms as PDFs. Forms are generated in the browser and can be saved via the print dialog (Ctrl/Cmd+P).

Available School Forms

Form	Title	Requires	Description
SF1	School Register	Section	Master list of class enrollment
SF2	Daily Attendance	Section + Month	Monthly attendance report
SF3	Books Issued/Returned	Section	Library movements tracking
SF4	Monthly Learner	School-wide	Enrollment counts by grade
SF5	Report on Promotion	Section (opt.)	Promoted/retained breakdown
SF6	Summary of Promotion	School-wide	Grade-level promotion summary
SF7	School Personnel	School-wide	Staff and teaching loads
SF8	Learner Basic Health	Section	Health & nutrition metrics
SF9	Progress Report Card	Student	Quarter grades per subject
SF10	Permanent Record	Student search	Historical academic file

SF10 Special Features

The SF10 (Permanent Academic Record) has unique capabilities:

- Auto-determines form variant: SF10-ES (K–6), SF10-JHS (7–10), SF10-SHS (11–12)
- Search students by name or LRN within the school
- 'Encode Historical' button for registrars to add historical grade records
- Displays complete academic history across school years

Teacher Access to School Forms

Teachers can generate school forms from their section detail page by clicking the 'School Forms' button. The section and school year are pre-filled automatically.

EVALUATIONS

Overview

The evaluation system supports two types of evaluations using a Likert scale (1–5 stars):

- Student !' Teacher — Students rate their teachers via the Student Portal
- Teacher !' Principal — Teachers evaluate the school principal

Creating Evaluations (Admin)

Navigate to Evaluations module to create questionnaires:

1. Click 'Add Evaluation' — set title, description, type, school year, and active status
2. Click 'Manage Questions' — add, reorder, edit, or delete questions
3. Toggle 'Active' when ready for respondents to see the evaluation
4. View results — see aggregated ratings per question

Teacher Submitting Evaluations

Teachers navigate to Teacher > Evaluations. Active teacher-to-principal evaluations are shown as cards. The teacher clicks 'Start Evaluation', rates each question 1–5 stars, and submits. The system identifies the principal automatically based on the school_head/super admin at the teacher's school.

Student Submitting Evaluations

Students log into the Student Portal and navigate to Evaluations. They see a list of their teachers (from schedules/adviser relationships) and can rate each teacher. Once submitted, a 'Completed' badge appears. See Chapter 15 for more on the Student Portal.

TRANSFER ENROLLMENT WORKFLOW

Two-Stage Approval Process

All inter-school transfers go through a mandatory two-stage approval process. There is no bypass — every transferee must follow the record request flow.

Stage 1: Record Access Request

This stage handles requesting and granting access to the student's records.

At the Destination School (School B)

Step 1: Registrar enters transferee's LRN in the Enrollment Wizard

Step 2: LRN lookup finds student at a different school! 'Transferee' mode activated

Step 3: Registrar fills enrollment details (grade level, section)

Step 4: Clicks 'Enroll & Request Record'! calls enroll_student_with_record_request

Step 5: Creates: enrollment (status: pending_transfer) + record request (status: pending)

At the Origin School (School A)

Step 1: Registrar sees pending request in Manage Requests > Incoming Requests tab

Step 2: Reviews student name, target grade, requesting school

Step 3: Clicks 'Approve' to grant record access (or 'Reject' with reason)

Step 4: On approve: record_access_granted = true, enrollment moves to pending_review

Stage 2: Enrollment Review

This stage handles the actual enrollment approval at the destination school.

Back at the Destination School (School B)

Transfer Status Flow

Stage	Record Request Status	Enrollment Status
1. Request sent	pending	pending_transfer
1. Origin approves	approved	pending_review
1. Origin rejects	rejected	pending_transfer (unchanged)
2. Destination approves	approved	active
2. Destination rejects	approved	dropped + access revoked

Transfer Out (Teacher-Initiated)

Teachers can initiate a transfer-out from the section detail page for active students. This marks the student as 'transferred_out' with a reason and optional destination school. The destination school then initiates the incoming transfer process as described above.

Important: No Pre-Released Bypass

All transferees use the full record request flow, even if the student is already marked as 'transferred_out' at the origin school. The StudentEntryMode type only includes 'new', 'existing', and 'transferee'.

DOCUMENT REQUESTS

Public Request Submission

Parents, students, and other schools can request official documents (Form 137 / SF10, Diploma) through the public request page at /requests.

Submission Flow

Tracking a Request

Requesters can track their request status by entering the tracking number on the 'Track Request' tab. The result shows the current status, a timeline of actions, and a download link when the document is ready.

Processing Requests (Staff)

Staff members process document requests in Manage Requests > Document Requests tab.

Status	Next Action	Description
pending	Mark Under Review	Acknowledge receipt and begin processing
under_review	Approve or Reject	Review completeness, prepare document
approved	Upload & Complete	Upload the requested document (SF10 PDF)
completed	Done	Requester can download via tracking page
rejected	Done	Rejection reason visible to requester

STUDENT PORTAL

Overview

The Student Portal is a separate, read-only interface for students to view their academic records and submit evaluations. Authentication uses LRN + Date of Birth (JWT cookie, no Supabase Auth).

Login

Students navigate to /student-portal and enter:

- Learner Reference Number (LRN)
- Date of Birth

On successful verification, a 24-hour JWT session cookie is set.

Dashboard

The student dashboard shows quick access cards:

- Grade Records — Link to view grades
- LRN Display — Shows the student's formatted LRN

Grade Records

Students can view their quarterly grades grouped by school year. For each year, a table shows subjects with Q1–Q4 grades and averages. Grades are read-only.

Evaluations

Students can submit evaluations of their teachers. The page shows active evaluations with a list of the student's teachers. For each unevaluated teacher, the student can click 'Evaluate', rate each question 1–5 stars, and submit. Completed evaluations show a badge.

PUBLIC LANDING PAGES

Landing Page (Home)

The public landing page at / provides:

- Hero section with 'Explore Schools' and 'Request Record' call-to-action buttons
- Enrollment Overview — Total enrollment statistics with school year selector, broken down by Elementary, Junior High, and Senior High (male, female, total)
- Enrollment by Grade Level — Bar chart showing enrollment per grade (K through 12)
- Quick Access Links — Cards linking to Schools, Learners, Document Requests, and Student Portal

Public Schools Directory

The /schools page lists all active schools with their School ID, Name, Type (color-coded badge), Address, and District. Clicking a school shows its detail page.

Learners Statistics

The /learners page shows enrollment counts by school, filterable by school year and district. Displays a table with columns for Kindergarten, Elementary, Junior High, and Senior High per school.

DIVISION ADMINISTRATION

Overview

Division admins manage schools and users across the entire Schools Division of Bayugan City. They are the only role that operates without a `school_id`, allowing cross-school visibility.

Division Dashboard

The division dashboard provides aggregate statistics across all schools: total enrollment, school count, staff count, and enrollment trends.

Schools Management

Create, edit, and manage all schools in the division (see Chapter 3: Initial School Setup for details). Schools cannot be deleted if they have assigned users.

Users Management

Create and manage staff accounts across all schools. Assign users to specific schools with appropriate roles. Users can be deactivated but not deleted if they have associated records.

Division Reports

Division admins can generate school forms for any school by first selecting a school from the dropdown, then proceeding with the normal report generation flow.

Cross-Module Access

When division admins access school-scoped modules (attendance, health, etc.), they see an additional 'School' dropdown to select which school's data to view. This allows monitoring and support across the division.

SETTINGS & CONFIGURATION

School Settings

Accessible to School Heads at Settings (labeled 'School'). Four configuration areas:

Record Editing Controls

- Allow editing records from previous school years — When OFF, grades/attendance/health from past years are locked (default: OFF)
- Allow editing grades for promoted students — When OFF, promoted student grades cannot be modified (default: ON)

Promotion Deadline

- Set a cutoff date for student promotions
- After the deadline, the Promote/Graduate button on section pages is disabled
- Can be cleared to remove the restriction

School Principal Configuration

- Principal Name — Full name with credentials (e.g., 'JUAN DELA CRUZ, PhD')
- Principal Title — Official title (e.g., 'Principal III', default: 'Principal')
- Used as signatories on report cards and official DepEd forms

ECCD Checklist Configuration

For schools with Kindergarten programs, navigate to Settings > ECCD:

- Manage Domains — Add/edit/reorder assessment categories (e.g., Physical, Cognitive)
- Manage Competencies — Add/edit/reorder individual skills within each domain
- Scale Score Mapping — Map raw scores to scale scores for each domain
- Activate/Deactivate — Toggle domains and competencies without deleting

GPA Thresholds

Accessible from the Enrollment page, GPA thresholds define the boundaries for the section assignment algorithm's student classification (high/mid/low GPA buckets).

Summary of Settings Impact

Setting	Affects
Edit previous year records	Grade Entry, Attendance, Health
Edit promoted grades	Grade Entry (teacher module)
Promotion deadline	Promote/Graduate buttons on section pages
Principal name/title	Report cards, SF forms
ECCD domains/competencies	ECCD Checklist (Kindergarten assessment)
GPA thresholds	Section assignment suggestions during enrollment

End of System Guide

For technical support, contact the Division ICT Office or the system administrator.
