

Student Transfer Enrollment Workflow

School Management System
Schools Division of Bayugan City

April 2026

Two-Stage Approval Process

1. Destination school enrolls transferee
! sends record request
2. Origin school approves record release
! grants data access
3. Destination school reviews student records
! approves/rejects enrollment

Stage 1: Destination School Initiates Transfer

Enrollment Module | New Enrollment

Who does this?

The registrar or admin at the school where the student wants to transfer IN.

Steps:

Step 1

Enter the student's LRN

Type the 12-digit Learner Reference Number in the enrollment wizard.

Step 2

System looks up the student across all schools

The system searches every school's records. If the student is found at a different school, a Transferee Detected card appears showing the student's info and previous school.

Step 3

Select grade level and section

Choose the target grade level and assign a section for the student.

Step 4

Submit enrollment

The system automatically creates a record request to the student's previous school. No manual steps needed.

What happens in the system:

After submission, the system creates:

- A record request (status: PENDING) sent to the origin school
- An enrollment record (status: PENDING TRANSFER) at your school
- The origin school's enrollment is marked as PENDING TRANSFER

What the student sees in the enrollment list:

Status badge:

Pending Transfer

— *Waiting for the previous school to release records*

The destination school now waits for the origin school to approve the record request. No further action needed at this stage.

Stage 2: Origin School Releases Records

Requests !' Incoming Transfers tab

Who does this?

The registrar or admin at the student's PREVIOUS school (origin school).

Steps:

Step 1

Go to Requests page !' Incoming Transfers tab

This shows all record requests from other schools asking to transfer your students.

Step 2

Review the request details

See which school is requesting, which student, and the target grade level.

Step 3

Click Approve or Reject

Approve releases the student's records to the requesting school. Reject keeps the student at your school.

What happens when you APPROVE:

The system automatically:

- Marks the student as TRANSFERRED OUT at your school
- Grants the requesting school READ-ONLY access to the student's data
- Changes the enrollment at the requesting school to PENDING REVIEW
- The requesting school can now view grades, attendance, and enrollment history

What happens when you REJECT:

The system automatically:

- Reverts the student's enrollment back to ACTIVE at your school
- Removes the pending enrollment at the requesting school
- No data access is granted

After approval, the enrollment badge changes at the destination school:

Status badge:

Pending Review

— Records released, waiting for destination school to review

Stage 3: Destination School Reviews & Finalizes

Requests | Pending Reviews tab

Who does this?

The registrar or admin at the RECEIVING school (destination school).

Steps:

Step 1

Go to Requests page | Pending Reviews tab

This is the FIRST tab on the Requests page. It shows all transfer enrollments waiting for your review.

Step 2

Click the Review button

Opens the Transfer Record Viewer dialog showing the student's complete academic history from their previous school.

Step 3

Review the student's records

The viewer has two tabs you can explore:

Grades Tab

- All subjects grouped by school year
- Quarter 1, 2, 3, 4 scores + computed average
- Passed/Failed remarks per subject

Enrollment History Tab

- Every school year, grade level, section, and status
- Shows the student's full academic journey

Step 4

Approve or Reject the enrollment

Based on your review of the student's qualifications:

If you APPROVE:

- Enrollment becomes ACTIVE
- Student is assigned to section
- Student can now attend classes

If you REJECT:

- Must provide a reason
- Enrollment is cancelled
- Data access is revoked

What to check before approving:

- Grade level eligibility — Does the academic history support the target grade?
- Academic standing — Was the student promoted or retained last year?
- Age appropriateness — Does the student's age match the grade level?
- Section availability — Is there space in the assigned section?

Quick Reference

Where to find things & status meanings

1 Where to Go in the System

Who	Action	Where in the System
Destination School	Enroll a transferee	Enrollment !' New Enrollment button
Origin School	Approve/reject record request	Requests !' Incoming Transfers tab
Destination School	Review records & finalize	Requests !' Pending Reviews tab
Destination School	Cancel a request	Requests !' Outgoing Transfers tab
Any School	See enrollment status	Enrollment list (status badge column)

2 Status Badge Guide

Pending Transfer

Waiting for the previous school to approve the record request

Pending Review

Records released — waiting for your school to review and approve/reject

Active

Student is enrolled and attending classes

Transferred Out

Student has been released to another school

Dropped

Student dropped out or enrollment was rejected

3 Key Points to Remember

- ALL transferees must go through the record request process — even if the previous school already released the student.
- The origin school's approval does NOT automatically enroll the student. Your school must review first.
- When reviewing, you can see the student's actual grades and enrollment history — no PDF files needed.
- If you reject an enrollment, data access is automatically revoked and the origin school is notified.
- The Pending Reviews tab on the Requests page is where you'll find transfers waiting for your decision.
