

SCHOOLS DIVISION OF BAYUGAN CITY • DEPARTMENT OF EDUCATION

School Management System

A unified digital platform for school operations — enrollment, academics, learner records, DepEd school forms, and division-wide administration.

Part 1 of 2 — **General Flow of Modules & Functionalities**

What the System Manages

One platform, the whole school lifecycle

- Learner enrollment, sections, subjects & class schedules
- Daily attendance, grades & class records
- Learner health (SF8) and early-childhood (ECCD) assessments
- Reading & numeracy diagnostics (CRLA, Phil-IRI, RMA)
- ARAL intervention tutoring program
- Textbook allocations & issuances
- Staff, rooms, and facility records

Records & compliance, built in

- Official DepEd School Forms SF1–SF10, generated as PDF
- Report cards with core-value ratings and signatories
- Form 137 / document requests from the public
- Inter-school learner transfers with record-access control
- Promotion, retention & graduation processing
- Test blueprints (TOS), exams & item analysis, MPS reporting
- Division-level oversight across all schools

Technology

- **Web application** — Next.js + React, responsive UI
- **Database & security** — Supabase (PostgreSQL) with row-level security
- **Authentication** — staff accounts + a separate learner portal login (LRN + birthdate)
- **Outputs** — DepEd-format PDFs and Excel exports

Cloud-hosted

Role-based access

School-scoped data

User Roles & What They See

Role	Access & Responsibilities
School Head / Admin / Registrar / Librarian	Full school-level modules: enrollment, sections, subjects, schedules, attendance, health, books, staff, rooms, reports, evaluations, settings, and request management.
Teacher	Own sections and subjects only: grade entry, class record, attendance, school forms, ECCD, assessments, examinations, MPS, book issue/return, adviser tools (anecdotal record, learner cardex), evaluations.
ARAL Tutor	Focused tutoring workspace: assigned intervention learners, session attendance, and individual progress tracking.
Division Admin	Division-wide dashboard: manage schools and user accounts, consolidated reports, division assessment and examination materials.
Student	Separate learner portal (LRN + date of birth login): view own grades and dashboard, answer teacher evaluations. Read-only.
Public	No login needed: browse schools and learners directory, submit Form 137 / document requests and track their status.

Every school-level user is locked to their own school's data. Only the Division Admin operates across schools.

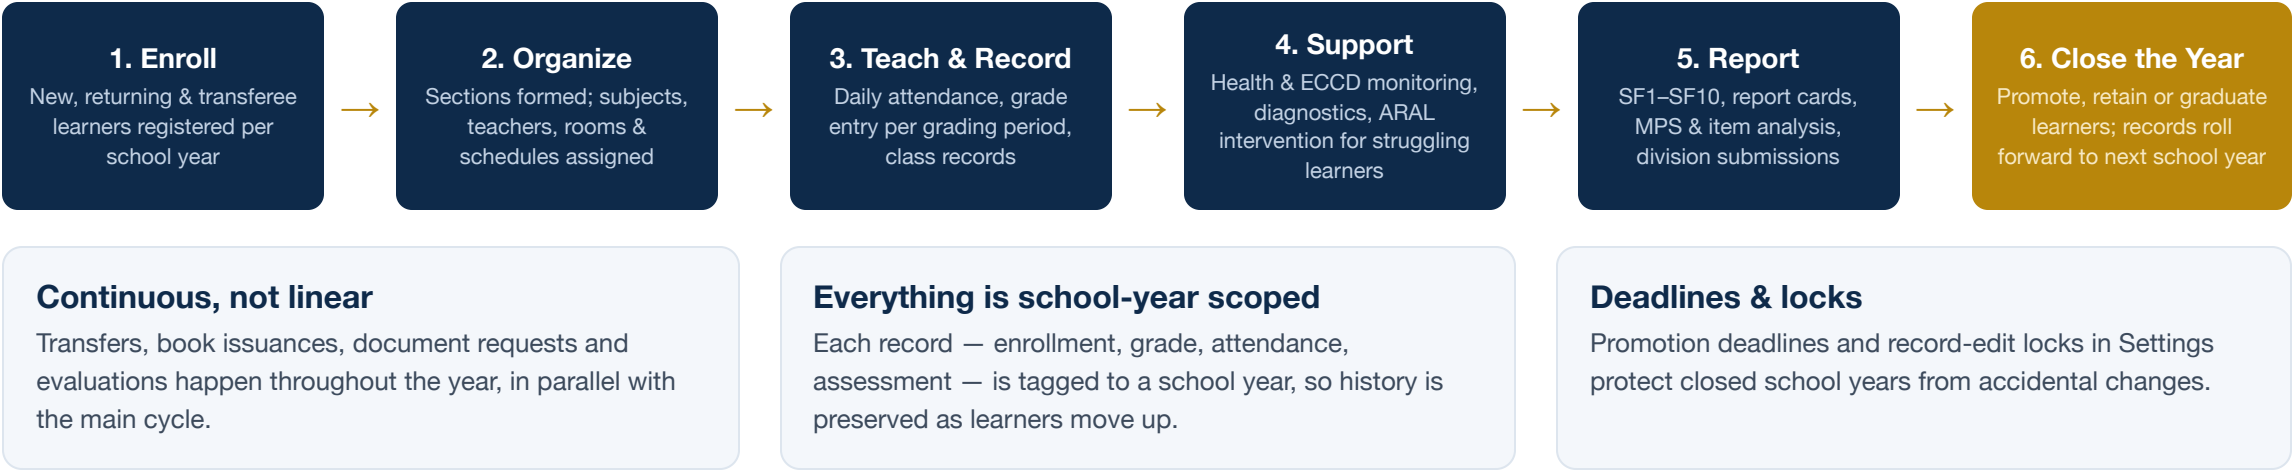

Modules at a Glance

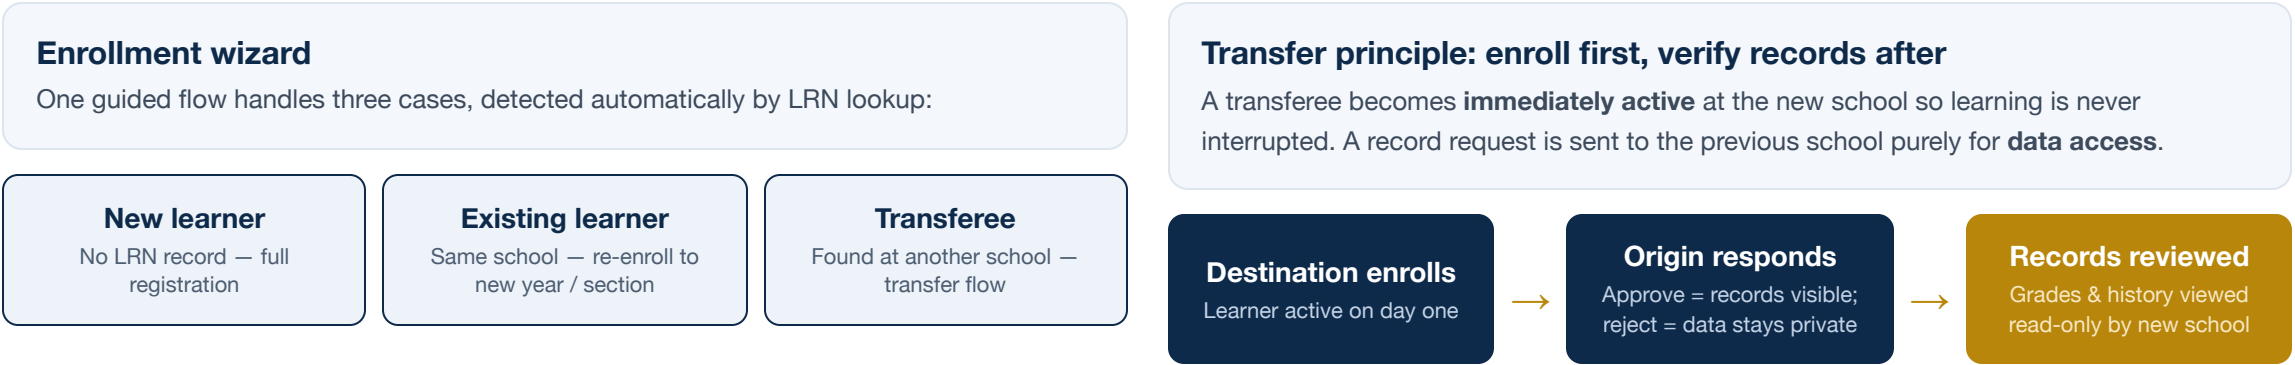

Six functional groups, one shared learner database — every module reads and writes the same enrollment backbone.

THE BIG PICTURE

One School Year, End to End

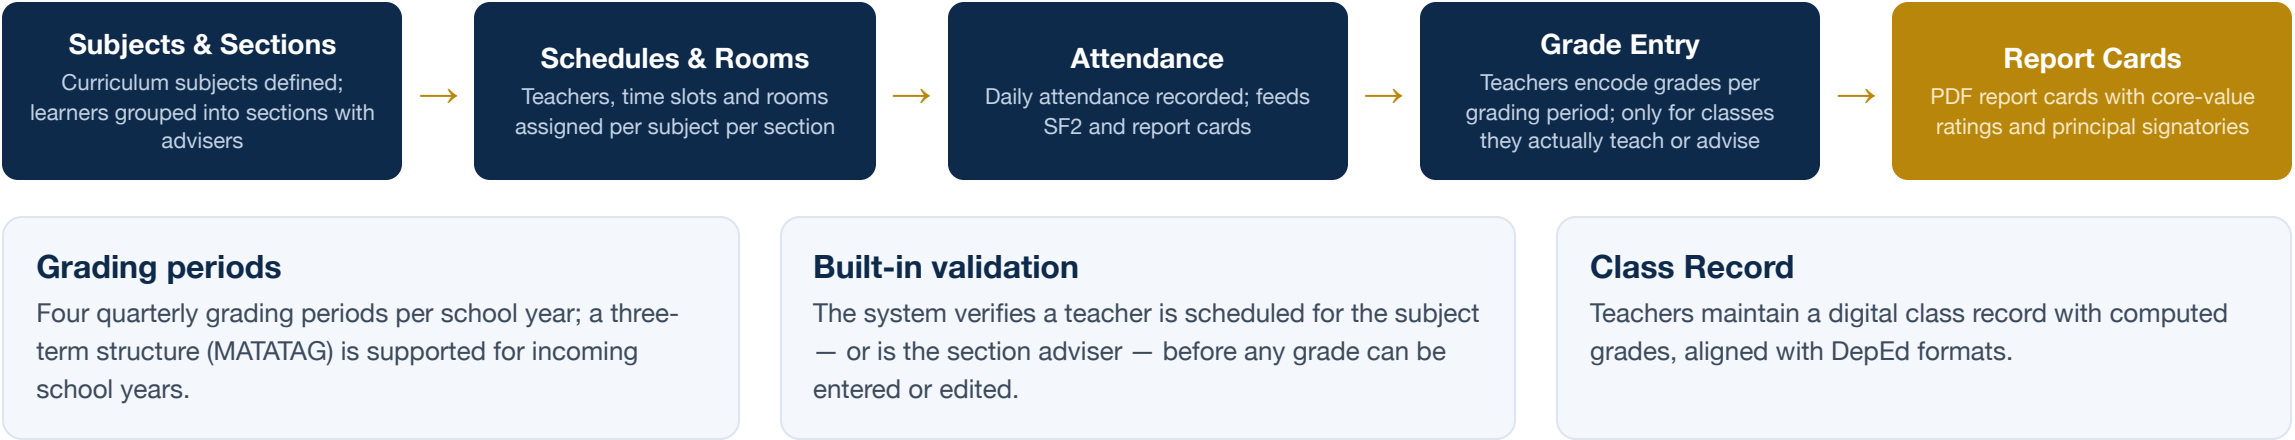

Enrollment & Transfers — General Flow

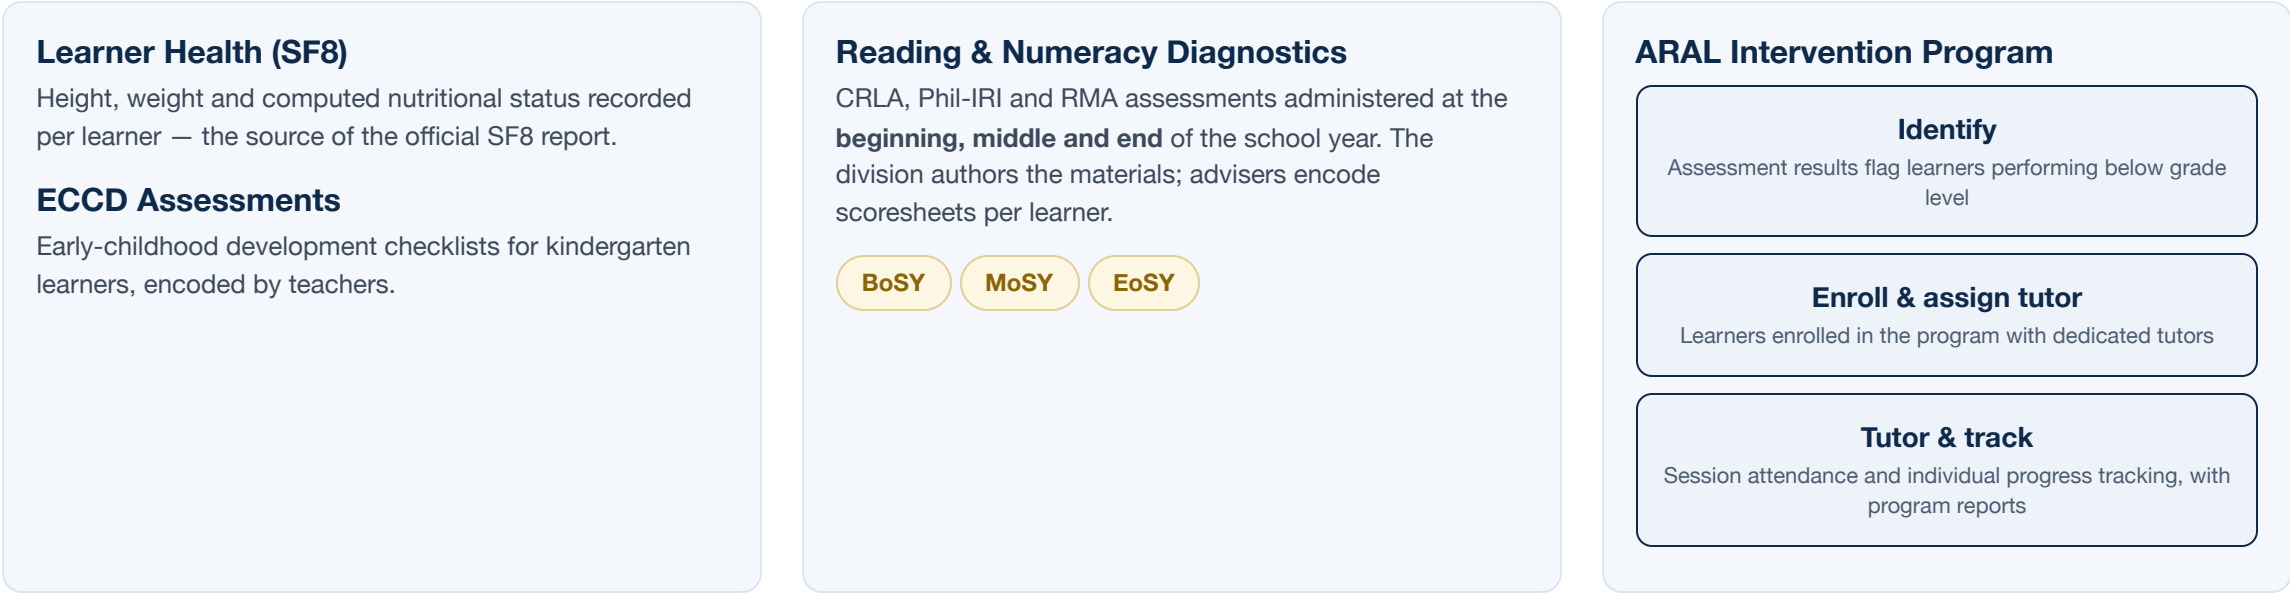

If a learner returns to a former school, their old enrollment is reactivated — no duplicate records. Enrollment statuses track the full lifecycle: active, completed, transferred out, dropped, retained, promoted, graduated.

Teaching & Grading — General Flow

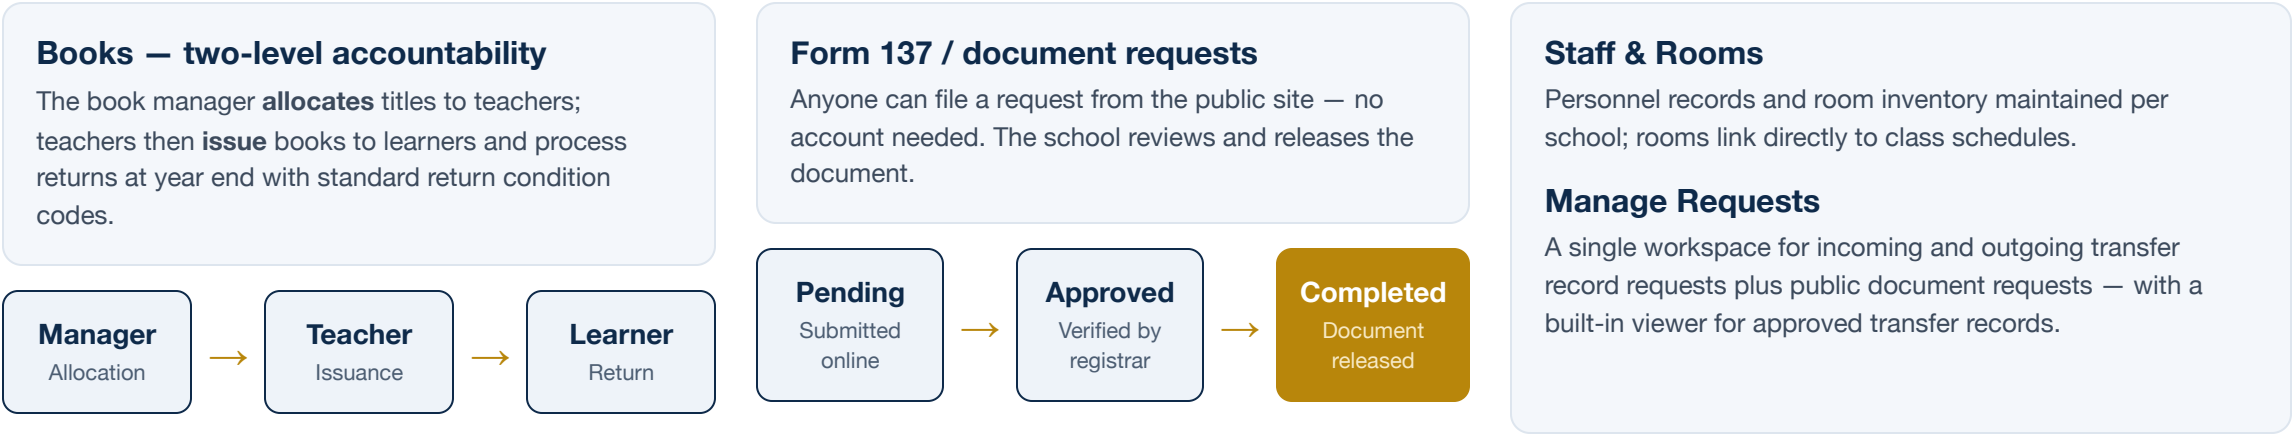

Health, Diagnostics & Intervention — General Flow

The loop closes: diagnostics identify struggling learners → ARAL intervenes → later assessments measure the improvement.

Books, Staff, Rooms & Document Requests

DepEd Forms & Analytics — General Flow

School Forms SF1–SF10

Official DepEd school forms generated straight from live data — no re-encoding. Filter by school year, section or learner and export as PDF. Historical grades can be encoded to complete SF10 permanent records.

SF1 Register

SF2 Attendance

SF5 Promotion

SF8 Health

SF9 Report Card

SF10 Permanent Record

Measurement & analytics

- **MPS** — Mean Percentage Score per subject, section and quarter, with mastery-level reporting
- **Item analysis** — per-question exam performance from the Examinations module
- **Evaluations** — student→teacher, teacher→principal and principal→teacher ratings on a 1–5 scale

Division roll-up

Schools submit reports upward; the Division Admin sees consolidated dashboards and reports across all schools in the division, plus division-wide assessment and examination materials.

PDF exports

Excel exports

ACCESS POINTS

Four Portals, One System

Staff Portal

Full sidebar of school modules for school heads, admins, registrars and librarians. Teachers get a focused workspace: dashboard, their sections and subjects, grades, class record, forms, assessments, examinations and adviser tools.

Tutor Workspace

ARAL tutors see only their assigned intervention learners — session attendance and individual progress trackers.

Student Portal

Learners sign in with LRN + date of birth (no email account needed). They view their dashboard and grades, and answer active teacher evaluations. Strictly read-only.

Division & Public

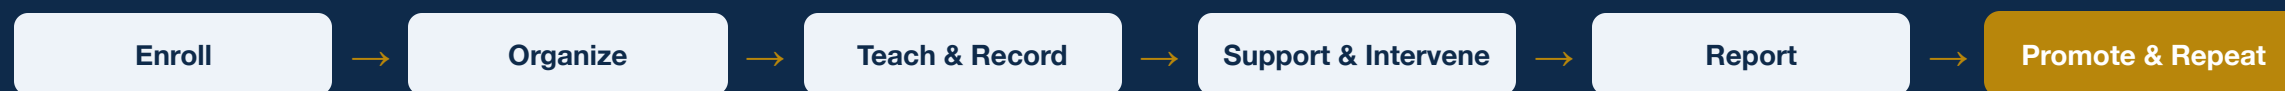

Division admins manage schools, users and consolidated reports. The public site lets anyone browse schools, look up learners, and file document requests.

Role-aware by design

The same application adapts its navigation, dashboard and permissions to whoever signs in — one codebase, six audiences.

SUMMARY

How It All Connects

- A single learner record travels through every module — from enrollment to graduation.
- Official DepEd outputs (SF1–SF10, report cards) are generated, not re-encoded.
- Transfers, requests and interventions run in parallel without disrupting the main cycle.
- Every role — from division admin to learner — gets exactly the view they need.
